ST. JACOB'S OIL.

The Great German Remedy.

Capt. HENRY M. HOLYWORTH, Chief
of the Cleveland Detective Force, was approached
in his office, in the City-Hall, and when subjected
to a number of his opinions of St. Jacob's Oil recently
accused "I have no right to give you a cent
afflicted with a combination of pleurisy and
rheumatism in the spine, which grew so bad that I
never slept in my bed for months. Doctors
failed to benefit me, and, acting on the suggestion
of a friend, I got up with a hand-crank and
convinced myself of the truth of the advertisement.
I could plainly feel the effects of the preparation
from the start. It healed the need and seemed to find
the way to the cause of disease. It completely
conquered all pain, and in a day or two I was
entirely free from the complaint, and have since
been remained well." - Cleveland Plain Dealer, Dec. 24, 1879.

Senator has provided for one of his hold, and gives these instances: Senator Morgan is clerk of his father's office, Senator Eaton, of the clerk of the fair committee. Senator of Indiana, is clerk of the state's committee. The son of Senator of Delaware, is clerk of his father's committee. The son of Senator of Virginia, has his son-in-law, who is clerk of his committee. Senator Jones, of Louisiana, and also has a clerk under Adams in the

house under the impression that it was wicked to her to eat and drink her last hours would not even allow her attendants to molest her parched lips. She said that the food offered her smelled good, but she was sorry the stopped eating, as she could not partake, as she had promised not to do so.

A fortune-teller has brought a foolish woman to her grave in San Francisco. Mr. and Mrs. Schreiber had been married about twelve years, and had been contented and happy. By frugality and industry they had saved a sum of money. A short time since they were induced to sign two documents, which they did not understand, because written in English. One related to selling their house, the other improving of Mission Square. On Friday night, Mrs. Schreiber, accompanied by her husband, a woman professing to be a fortune-teller. She told Mrs. Schreiber that in consequence of her unfortunate transaction in stock she would be great trouble to them. That a great deal of trouble would be brought upon them, and that she must beware of another woman, a friend of hers, who would make a fortune in stocks and marry a rich man. These thoughts greatly affected a very nervous woman. She swallowed a great deal of cold poison—enough to kill her.

The recent explosion in a New York factory for the manufacture of celluloid rods, which resulted in the death of one person and the wounding of several others, besides demonstrating the dangerous nature, under certain conditions, of the most painful and, at the same time, mortally interesting, of the art of bridge-painting, has raised a public question in which every parent of a marriageable daughter is vitally interested. It is a well-known fact that young persons, after arriving at a certain age, are inclined to seek the company of the opposite sex, and in this relationship, it is found to have been, in many instances, to their mutual and subsequent happiness or divorce proceedings, as the case may be. Previous, however, to the nuptial ceremony and consequent assumption of future dry-goods bills of lading, it is well known that the danger alights upon the girl most liable to manifest itself, and, as it is almost always provided by the parents of the young lady in the case, even before her father the expense of a large and fashionable funeral, to say nothing of the sum which invariably attends the marriage of a person of this class, is being wretched and about to enter upon a career of usefulness and shirking.

Perhaps no fact is better established than that during the courtship of young people the only article of furniture considered absolutely essential in the family parlor is a night-table, when the young man calls in a large and stoutly-built chair, capable of sustaining the weight of two persons. Another well-known fact is, that on such occasions it is almost impossible for the young man to get away with his girl, as he is sure to be pestered by the young man, the customary method of securing this result being for him to assume a strong and willing arm immediately before her husband's veranda, in which situation even the most delicate of women have been known to acquire a strength of will that enabled them to sit up in bed at 20 p. m. with a smile upon their faces as these the danger lies. The manufacture of celluloid has increased to a great extent in the past year that a considerable proportion of young men in all grades of society are habitual weavers of such and other articles of celluloid. This celluloid may be expected by friction the dreadful catastrophe in New York amply proved, and until this danger is removed the life of no society ornament who is being woven by a man added to the wearing of cuffs and collars, to become a dangerous and prominent life-interests agent.

Although it will doubtless be claimed by superfluous writers on this topic that the danger is an extremely remote one, owing to the well-known fact that, under the circumstances above described, young ladies are invariably quiet, manifested not the slightest disposition to push aside the young man, and, in the event of his attempting to penetrate the girl's veranda, it is in such cases as these that the danger lies. The manufacture of celluloid has increased to a great extent in the past year that a considerable proportion of young men in all grades of society are habitual weavers of such and other articles of celluloid. This celluloid may be expected by friction the dreadful catastrophe in New York amply proved, and until this danger is removed the life of no society ornament who is being woven by a man added to the wearing of cuffs and collars, to become a dangerous and prominent life-interests agent.

RUSSIA. Troubles with Germany.

St. Petersburg, Jan. 11.—Official herald is given the publication that the police had discovered the hiding place of nihilists for revolutionary proclamations.

ORGANIZING THE POLICE. Moscow, Jan. 11.—A Berlin dispatch says the entire staff of the Governor-General of European Russia has been summoned to St. Petersburg to discuss the question of reorganization of the police system. The Czar is profoundly satisfied with the present force.

A MISTAKE. The *Moscow Gazette* now says the statement which it published, that Count Schouvaloff was likely to be appointed Minister of the Interior, with a department of police in his Ministry, is entirely without foundation.

The *Journal of Siberia*, the only uncensored newspaper in all Siberia, has been suppressed indefinitely. The Censor not having been informed of the name of the contractor, it is entirely without foundation.

Review of Financial Matters in Chicago Last Week.

The Produce Markets Generally Easier—Grain Quiet.

Commodities Moderately Active—A Fair Export Demand for Neats.

FINANCIAL.

Towards the end of last week the country sellers for remittances to New York became so heavy that our Chicago banks were compelled to ship currency to New York. Our receipts of currency dwindled down to almost nothing. New York exchanges between banks were up to \$100,000 per day, the premium, and closed at \$100. That is the highest figure to which New York exchange can settle, as the cost of shipping currency is 50¢ per \$100. But the discount rate has recently gone as low as \$20 per \$100,000, as New York was compelled to pay \$100,000, and the cost of shipping gold on account of the scarcity of greenbacks. The closings of the Chicago banks for the week showed a gain of 45 per cent over the corresponding week of last year. The demand for money fell off perceptibly on account of the large redemptions of bonds, and the large accumulation of funds after the first of the year. Bank rates were quoted at 7½ per cent; on the street, rates were 62½ per cent. Local securities have been in demand at increasing prices, and Chicago has been buying its bonds from New York at a premium. The rising prices of New York stocks have begun to attract buyers again, but the general public have not yet recovered the fine frenzy of which the break of last November cured them. Transactions on the Chicago Mining Stock have been light, but as several new mines have been listed, business is expected to improve.

The Directors of the Burlington & Quincy Road have postponed till next Saturday action on the proposed consolidation with the Burlington & Missouri in Nebraska. The two companies' Directors are not confident of the ability of the consolidated company to continue paying 8 per cent dividends on \$50,000,000 of capital, and are opposed to the proposed increase. A rumor in the Boston Advertiser of a further probable consolidation between the Atchison & Santa Fe and the Company, on a basis of paying thirty-four per cent bonds for its entire capital finds little credence.

The gross earnings of the following railroads are reported:

THE NEW YORK TIMES.
After a careful analysis of the reports of earnings of the railroads, it is not justified to say that the earnings of the railroads are not sufficient to pay the interest on the bonds of \$100,000,000. The earnings of the Western roads will amount to \$4,200,000,000 in the 1890 to 1891, to \$4,200,000,000, a constantly increasing charge, to say nothing of the possible issue of \$2,500,000 more of bonds already provided for, but not yet placed on the market.

The Correspondent, James P. Wilson, Iowa, C. E. Perkins, Vice-President, and T. J. Potter, Assistant General Manager, Chicago, Burlington & Quincy Railroad, arrived yesterday by special train at the Grand Pacific Hotel.

The Bricklayers' Union met yesterday afternoon at No. 69 Hasted street to discuss the situation for the coming season. The meeting was opened by a general vote of no business of importance to the public was transacted.

The Mapleson opera company will arrive to Chicago this morning from the West via Fort Wayne Road. They left the Hub Saturday evening on a special train. The trip from Pittsburg to Chicago will be made at the rate of forty miles an hour.

Mr. Charles C. Salveson denies that statement of an evening paper that he is an impostor and has come to collect a debt from alien oppressors. St. Patrick found Socialism there in 42, and the speaker contended that it was Socialism enough for anything; in fact it was one of the leading planks in the Socialist platform that the Government, now in power, but of course it should run the railroads. Yet Mr. Parnell was doing a good work, and he was open to the world for more advanced ideas. He had no cause to be so much as a cent individual ownership of land. For that reason he thought every socialist should support Mr. Parnell.

He announced that the subject for discussion was the visit of Mr. Parnell, and the views of the Socialists thereon. He thought that the speaker would support Mr. Parnell, although his views were not those of Mr. Parnell.

Mr. Sullivan wanted to know if the Socialists were going to give Mr. Parnell a reception. He said that the Socialists were not so good as the Republicans, and that the attack on him is due to the ill-feeling of a member of a rival organization.

Mrs. Gage, a Lake View resident, while crossing the intersection of State and Randolph streets at an early hour yesterday morning, on her way to the office of Dr. Pierce, was run down by a private carriage, the owner of which was unknown. The lady was rather badly injured, and one tooth knocked out. She was attended by Dr. Eldridge, and was then sent to a hospital in the same carriage which had been driving her.

The body of James Powers, who had been missing since Dec. 10, was found at 10 o'clock yesterday morning near the north intersection of Quarry street and the Chicago & Alton Railroad, in a basin known as "Gull's Nest." The body was found alive and was under the influence of liquor, and it is supposed that he too was a victim of that vice. His pockets were empty, and his coat was found to be a short distance away from the abandoned pontoon, and his home, No. 109 Archer avenue, was nearby.

The body, which was badly decomposed, was taken home, and later in the day Coroner Mann found that he had been accidentally drowned.

Mr. Powers was 50 years of age, and left a wife and four grown sons.
